Professional Summary

Informatics student with experience in Linux administration, Docker, networking, and mail server configuration through internship and self-learning projects. Passionate about DevOps, system administration, infrastructure management, and website development. A disciplined, responsible, and fast learner who is able to work effectively both independently and in a team environment.

Technical Skills

- Linux Administration (Ubuntu & Basic RHEL)
- Docker & Docker Compose
- Basic DevOps
- Basic Networking
- Zimbra Mail Server Installation
- DNS Configuration
- Fiber Optic & VSAT Installation
- Internet of Things (IoT)

Soft Skills

- Problem Solving
- Teamwork
- Leadership
- Communication
- Fast Learner
- Responsibility
- Time Management

Education

Bina Sarana Informatika University | Bachelor of Informatics | 2025 – Present

Relevant studies include programming, computer networking, databases, system security, and software development.

Telesandi Bekasi Vocational School of Telecommunications | Major in Telecommunications Engineering | 2022 – 2025

Learned telecommunications fundamentals, networking, electronics, fiber optic installation, VSAT systems, and Internet of Things (IoT).

Internship Experience

Internship Student — PT Excellent Infotama Kreasindo 2024

Assisted in Linux installation and server configuration, learned Docker and basic DevOps implementation, managed basic server administration tasks, monitored and checked company client emails, installed and configured Zimbra Mail Server on Ubuntu Linux, and supported technical as well as administrative operational activities.

Projects

Zimbra Mail Server Deployment

Installed and configured Zimbra Mail Server on Ubuntu Linux, including DNS and email service configuration for server communication.

Project Documentation:
